

fresh as rain

Rain Fresh Air RFA5000 air purification system offers the best of all proven air cleaning technologies, efficiently packaged in a single compact, integrated unit.

Aggressively destroys germs and bacteria with titanium dioxide technology

Eliminates dust, dirt, pet dander, pollen, and other allergens with a powerful negative ion generator

Captures and contains particulate matter with a specially-designed 4 stage HEPA filter

Destroys irritants with a powerful ozone generator

Air as fresh and clean as the outdoors after a spring rain – in the comfort of your home!

RAINFRESH™

A I R

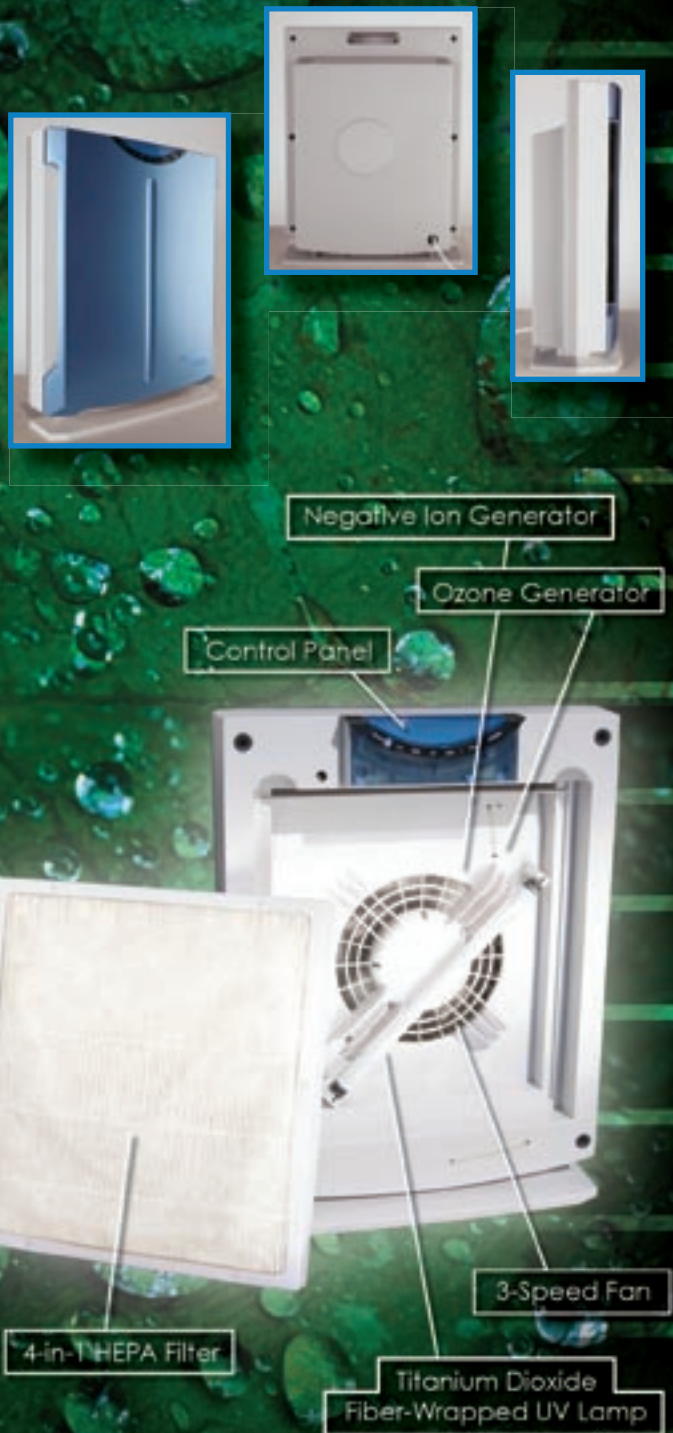

RAIN FRESH™

AIR

- Eliminates germs, bacteria, viruses, mold, and fungi with titanium dioxide technology. A custom TiO² fiber wrapped ultraviolet lamp generates TiO² active radicals that aggressively destroy irritants.
- Eliminates dust, dirt, pet dander, pollen and other allergens with a powerful negative ion generator. As an added benefit negative ions create that Rain Fresh Air smell found in nature.
- Captures and contains dust, pollen, and other particulate matter with a specially designed 4-stage HEPA filter. This filter has 4 technologies at work:
 - 99.97% minimum rated HEPA filter for maximum filtering of dust, dirt, smoke, and pollen. Pleated for increased air flow.
 - Activated charcoal layer for superior odor, fume, and smell elimination.
 - Silver nano-particle layer to add additional mold, fungi, and bacteria protection.
 - TiO² photo-catalyst layer to increase effectiveness against bacteria, mold, viruses, and fumes.
- Kills bacteria, viruses, spores, mold, and mildew throughout your whole house with a powerful ozone generator. Produces ozone levels that are safe for people but not for irritants!
- Exclusive control system allows you to choose what cleaning technologies are in use. In addition to the HEPA system you may choose any or all combinations of titanium dioxide, ozone or negative ion cleaning technologies. As an added benefit a timed 1-hour ozone setting helps prevent possible ozone build up in smaller rooms.

Specifications

Power: 120 vac, 60 Hz
 Wattage: 35/30/20 watts based on fan speed
 Air Movement: 70/50/35 cfm air movement based on fan speed
 Size: 6.85" D x 15" W x 19.3" T
 Weight: 8.8 lbs.
 Replacement filter: RF5000
 Replacement lamp: RL5000
